Company Profile

PS Digitech-HR (INDIA) PVT LTD. is a very young and highly dynamic Project Management & Engineering Services Company. It is managed by a group of highly trained project management professionals with multi-disciplinary skills and a wide spectrum of experience. The company is headquartered in Kolkata, India.

The aim of **PS Digitech-HR** is to deliver world class project management and consultancy services, through forming close alliances with its Clients. In executing their roles, PS Digitech-HR's employees, currently over 60-strong, are encouraged to perform at all times to the highest standards of excellence upholding the company's core values - Honesty, Integrity and Transparency.

At **PS Digitech-HR**, we put effort to understand the need of our clients and work to consistently deliver projects on time and within budget. We maintain a responsive and transparent relationship with our clients and meet their project challenges as one of our own. Our portfolio, in a very short period of operation, includes successfully completed projects in sectors such as Cement, Power, Iron & Steel and also Residential & Commercial Buildings. We are empowered with knowledge to deliver projects safely and efficiently, while constantly redefining industry best practices.

Company Profile

PS Digitech-HR is also a leading work share solution provider to the global Engineering Design Industry. We provide value added design support solutions evolving from outsourcing of computer aided design (CAD) documentation, 3D modeling and Finite Element Analysis (FEA) services to engineering firms.

At our CAD documentation, drafting and FEM/FEA studio in Kolkata, India we put our integrated team to work for the outsourcing needs of our clients, helping them focus on core competencies without enhancing costs or investment in support functions.

PS Digitech-HR has created a Training Institute under the brand name of **INSTITUTE OF PROJECT PLANNING & MANAGEMENT** to offer world class training in the following modules:-

Project Planning & Management

Quality Control & Quality Assurance

Behavioral Management

CAD Software

In the perfect world every project should finish “On Time & within Budget”

But reality tells a different story.....

Most of these projects suffer a time and cost overrun...

Trying to manage a project without PROJECT MANAGEMENT is like trying to play a football game without a game plan....

Project Management

PS DIGITECH-HR is well equipped to provide Project Monitoring & Control support to clients in handling planning and monitoring process of large volume infrastructure/construction projects and successfully deliver projects on time and within budget.

The dedicated PMC team of **PS DIGITECH-HR** works in close co-ordination with the client and the project consultant and all other project stake holders to create an initial project scope, WBS and work out the project timings. The project schedule, activity sequencing and incorporation of changes is also a direct responsibility of **PS DIGITECH-HR** team. Once the schedule is finalized it is published to all concerned for construction to begin.

Quality Control & Quality Assurance

Quality control during the construction process is extremely important in order to safeguard the value of the owner's investment. **PS DIGITECH-HR** QA/QC personnel can perform checks and tests throughout the construction process, providing the project owner assurance that the project is being built according to specifications.

The first step in establishing the requirement for construction QA/QC is to develop a quality management plan. General construction inspection and verification requirements include inspections, QC testing, QA testing, establishing construction acceptance criteria, construction audits, compliance with handling, storage, packaging, preservation, and delivery requirements, and material identification and traceability.

PS DIGITECH-HR Inspectors will uncover construction deficiencies. These will need to be identified, reported and corrective and preventive action taken.

Document handling and retention procedures are important. Records are updated on a daily basis and a daily construction report issued. The construction QA/QC plan requires that all construction drawings be stored and that As-Built drawings be prepared and reviewed.

You

Health & Safety in Construction

PS DIGITECH-HR is concerned about safety at your construction site. That's why we're committed to providing the safest and most qualified skilled safety officers for construction projects, and to working with you to ensure each jobsite maintains the safety record we both strive for.

PS DIGITECH-HR'S approach to safety at construction site includes assessments of safety performance and attitude for each of our employees. To increase safety at construction site, a team of field safety specialists work with customers to maintain the safety of every jobsite. On-site safety evaluations & safety program planning are also available.

Additionally, **PS DIGITECH-HR** works towards achieving complete safety on construction site by pre-screening our employees for job qualifications, regulatory compliance and safety. If we don't believe an employee can comply with our standards for safety at construction site, then they won't be placed with our clients – no exceptions.

We encourage all of our clients and employees to partner with us to promote safety at construction site.

Causes of Accidents :

1. I didn't think
2. I didn't see
3. I didn't Know

Clients - Project Monitoring & Control

PS DIGITECH-HR is the authorised Project monitoring partner of ACC, Ambuja Cement & Reliance Cement. Handling projects successfully pan India to complete those within proper time and cost.

■ Projects Completed-

Clinker Bulk Loading Facility - **ACC Galgal.**

Bag House Construction & Augmentation of Cooler ESP for Line One & Two - **ACC Kymore.**

Packing Plant and Wagon Loading Platform - **ACC, Kymore.**

Expansion of Integrated Cement Plant - **ACC, Chanda.**

Re-Construction of Railway Lines in **Sri Lanka - IRCON.**

■ On-going Projects-

Integrated Cement Unit with a capacity of 5.0 MTPA and a clinker unit with a capacity of 3.6 MTPA at - **Maihar - Reliance Cement.**

Grinding Unit with a capacity of 2.0 MTPA at **Kundanganj - Reliance Cement.**

Waste Heat Recovery Based 8 MW Captive Power Plant - **ACC, Galgal.**

50 MW Solar Power Plant at Rajasthan - **Godavari Green Energy Pvt. Ltd.**
